

If you develop Social Games I want to talk to you. Im looking to invest in games, developers and projects

Im looking for consumer and corporate applications. I'm not looking for knockoffs of existing games/apps. I'm also looking for physical products that have integrated social gaming components . My preference for all the above is that they run on or integrate deeply with Facebook and/or iTunes 10/Ping and all the devices they support.

You can post them here or email me at blogmaverick@aol.com.

If I like it , I will respond. If I dont, I wont. I wont sign and NDA.

TIA
